19 EAST 32D STREET, New York, March 15th, 1883. I have used Allcock's Porous Plasters in my practice with remarkable success, and found them peculiarly efficacious when applied to the back for Weak Spine and Nervous Exhaustion; they afford almost instant relief in Coughs, Colds and Liver Complaint. I cordially recommend them as the best and safest Plaster ever made, and would caution the public against the numerous other so-called Porous Plasters that are sought to be palmed off on a credulous public; they are worthless and oftentimes dangerous.

ADA'S PUBLIC BUILDINGS. The following paragraph appeared in a Buffalo (N. Y.) evening paper yesterday afternoon: "J. J. McBride, a prominent Fenian, states that a meeting of Irishmen was held in this city last night to take action regarding the avenging of the hang-ing of O'Donnell. A Philadelphia Times correspondent hunted up McBride last night. He is an eccentric fellow, and is noted for his bitterness against English people. In Toronto last summer, when on an excursion, McBride took a British flag from his pocket and, spitefully throwing it upon the pavement, executed a war dance upon it. A crowd collected, but did not interfere, thinking that McBride was either drunk or crazy. His friends hurried him away as a ings have been held, and we are determined to avenge the brutal murder of O'Donnell by the English authorities. Our plans are not yet fully matured, but when we get ready you may expect something startling "

"What do you propose to do?" was asked.
"We propose to avenge O'Donnell's hanging by attacks on Canada. I have been experimenting with dynamite and know how to use it." "Do you contemplate blowing up anybody?"
"I presume the government buildings in Toronto and Ottawa will be made the object of attack." When they are blown up the work will be done at. night, when no innocent people will be done at night, when no innocent people will be likely to be killed. We cannot be extradited for blowing up buildings, but we can for murder. The damage to property and the fright given to Canadians will accomplish our result."

"When will you blow up the Canadians?"

"Now I am not going to tell you everything I know, for that would frustrate our plans."

"Can you give the names of any persons associ-

Nobody was killed. A lamplighter named Butler observed two men watching a canister burning opposite a dwelling-house. Going up to the canister he kicked it a few yards, when suddenly an explosion occurred, breaking the windows of all the houses in the vicinity. The two men who had been watching the burning canister escaped and there is no clue to their identity. A fuse a foot and a half long was found near by, together with a leather match-case.

He was picked up and removed to the hospital, but died before reaching it.
